The topics identified are: (1) economic development and the health sector, (2) preference is given to an intervention with a lower success rate, i.e. ... not the best place to live. But the country's economy, on the other hand, is in good shape. The economy is mainly dependent on the production and export of oil. It has already more or less recovered from the crisis, and within a few years it will develop mainly with a positive result. Judging by the results, this year the growth will be 3%, and next year it will be 5%. In addition, the government continues to implement reforms that should stimulate economic growth.
