Read on to see how much this software is worth! Where can I download AutoCAD? If you're looking for a free trial, we recommend downloading AutoCAD or AutoCAD LT from Autodesk. AutoCAD LT is a powerful lightweight CAD package specifically designed to create 2D schematics or drawings, and AutoCAD is a powerfull application that is best suited for design work. Both programs are compatible with many other industry specific software applications. AutoCAD Features: Tutorials: If you are new to CAD, AutoCAD offers a free tutorial in the "Help" menu on the screen. It is always a great idea to read the tutorial before trying to use a program for the first time. AutoCAD Tips: Other great AutoCAD tips are available on Autodesk's Tips & Tricks webpage. Customized Views: AutoCAD allows for any number of customized views of the drawings. Just click the "Custom" button in the toolbar, and you will see a drop down menu where you can create your own custom views of the drawing. Document History: AutoCAD keeps a history of changes that are made to the drawing. Click on the Document History button on the toolbar, and a menu will appear where you can choose from different levels of history to view. Template Library: AutoCAD offers several templates you can use for your drawings. Click the "Template Library" button on the toolbar, and then select the template you wish to use. The name of the template is listed in the right column of the window. Review Drawing: By clicking the Review Drawing button on the toolbar, you can review all the drawings in your project. Rotation: If you would like to rotate a part of the drawing, just double click the part and click the Rotation button. Shapes: You can add the ability to draw shapes in your drawings. Click the "Shapes" button on the toolbar, and a new window will appear where you can create your own shapes. Save As: The Save As option allows you to save your drawing to a specific file. Text: If you wish to add text to your drawing, click the "Text" button on the toolbar

What's New in Power BI 19.1 One of the most anticipated upgrades in Power BI is the release of Power BI 19.1. This is the first Power BI release to include both a Service Application and Report Server. Previously, you could only use the Service Application for creating and running reports, but now you can use the Report Server to load and run reports created by anyone using the Service Application. These new features make it easier to share reports, even if they are loaded into a Report Server from another location. And thanks to enhanced query capabilities and the new Power BI Report Server Editor, it's easier than ever to create, run, and share the reports you want. Power BI Service Application Power BI Service Application With the addition of the Power BI Service Application, you can now use Power BI as a self-service option for your users. The new Power BI Service Application contains the same rich set of features as the Power BI portal, but it doesn't require a Power BI account. Users can create and run reports, give you feedback and collaborate on reports, and then save them to a Power BI Report Server for your business. The added benefits are that reports created in the Power BI Service Application are now searchable and can be shared with anyone who has a Power BI account. Power BI Report Server Power BI Report Server The release of the Power BI Report Server adds more control over the reports you distribute and creates reports that are accessible by anyone in your organization. Instead of delivering Power BI reports via email, you can now send reports to the Power BI Report Server, which is accessible from anywhere on your network. You can even generate reports that only your team can see. And thanks to improved query capabilities and a new Power BI Report Server Editor,
