I wanted to post the same question on Apple's forums but there's no way for me to do that, so I'm asking here. I have a 15" MacBook Pro and I'm having issues with the audio. A lot of times when I'm using the sound or the microphone I'm getting a lot of pops or "clicks" but I think this is a problem on my end because the audio works fine on my desktop. Sometimes I need to plug my headphones in to get the sound to work. What could this be? A: I solved this problem by doing the following: In the System Preferences, it's important to set the Sound Output device to the Internal Audio Output. In the Sound Volume Control panel, there's a Hardware button, which is found in the first menu, "Sound". In my case, there was no Hardware button. Instead, I found a menu, "Hardware -> Sound -> Playback (1)". With this, I'm now able to use both the speakers and the headphones. Title: A review of methods for measuring basal body temperature Author: Cappa, G.E. Published: 1997; Springer-Verlag Berlin Heidelberg GmbH, Pages: 195-212 Abstract: Basal body temperature (BBT) is a commonly used parameter in the assessment of human disease and is usually estimated by making a subjective judgement on the part of the person taking the measurement. Several methodologies have been proposed and applied to the measurement of BBT, none of which are truly objective. The paper reviews these methodologies and suggests areas for future research. dining room ideas Post navigation dining room ideas In case you've been in a position to watch some TV nowadays, you're already familiar with the Rachael Ray's Day Off" concept. ...Q: Is there a term to describe a style of dog that is always happy, playful, and social? I was talking with my wife today and I described her dog as "eccentric", but I feel like there is a better word to describe the breed in question. A few examples: His tail wags all the time He's always playing, even when it's not his turn He loves to climb things, just to see what he can do He plays with all of our other dogs (he's the only one who'll let them play) He always runs around the house He will play with toys, even the small ones that only he can play with He loves to wrestle with us He wants to be the "strongest" (even if it's just our little dog) He's a lot like a child in some ways He wants to play and play and play (we can only give him a couple minutes of playtime at a time before he starts to get bored and wants to do something else) I'm not a huge fan of the word "eccentric" and was looking for a better term to describe the dog in question. A: By now, I think most people would agree that the word you are looking for is affectionate. My own dog is affectionate and playful. A: I like the word Curious. I have read that even small dogs tend to be curious, and large ones can be intensely curious. (My favorite example: a large dog in a pet store who immediately wanted to investigate the bucket of water) I would use it mostly as a noun, rather than a description
