I can't even begin to imagine what it would be like to live in a place such as Tetovo, a city located in the northern province of Macedonia. Our home is in the middle of this beautifully preserved and artistically shaped national park, which has historically been home to various ethnic groups. The area's rich history and scenic beauty are only enhanced by the rich architectural heritage it and other nearby locations have to offer. Currently, we are guest-studying at a local university and at one of the university's off-campus centers. We live in a downtown apartment, where I am able to run my own little business through my design studio. Our life in Tetovo has been fascinating so far. As a photography enthusiast, I am blessed to live in a city where the rich local arts culture allows me to participate in some of the city's visual arts activities. The city center offers some outstanding photo opportunities. Many of us photographers love auto-correct. Actually, maybe we love it too much, because it's not a good thing if the editor you've become too dependent on isn't working correctly. Admittedly, the auto-correct feature in Adobe Lightroom CC can be a real problem. For example, the "A" button will find and replace any letter or number in an image with an "A" or a "1." What a useful feature! With the release of Lightroom CC 2018, this problem can now be corrected. For example, I may be shooting on a studio floor when my image "A" is replaced with a thumbnail. I may then use a different function to compare the thumbnail to the image I previously saw, before I finally change the A to my original image.

We use Photoshop Elements exclusively for our own photo books. As a photographer, I agree that there is no substitute for more than one photo editor to be a part of your photographic workflow. I use two Adobe apps, Photoshop and Lightroom, on a daily basis. I use Lightroom as my primary editing tool and Photoshop for fixing color. Since the tools in Lightroom are similar to the tools in Photoshop, I believe they can be used interchangeably in the majority of the tasks a photographer must perform. The key difference is that Photoshop has a robust selection tool that is very helpful to work with in making effective selections. The free version of Lightroom does not have all the comprehensive editing tools that Photoshop has, but it does provide an excellent entry-level editing tool to use before you purchase any of the other higher end editing tools provided by Adobe. 933d7f57e6

To address the biggest concern amongst users with regards to editing on the web, Photoshop as a browser app introduces new capabilities that deliver the power required by photographers, creatives, and professionals to get more creative than ever before. New technologies include a powerful new selection engine powered by AI, and a one-click Delete and Fill to remove and replace objects in images with a single action. "Photoshop is an excellent example of the architecture that Adobe is building to address these challenges," said Geoffrey Amos, leader of technology for Photoshop and Creative Cloud, Adobe. "Our photo editing application was first introduced in 1994 with the advent of the desktop PC. Since then it has grown to help all kinds of people, from a lone enthusiast to a team of passionate professionals, explore, create, and share images, video, and ideas. This new release is the next step in our journey to make Photoshop the best photo editing application in the world, because it is based on the promise of true collaboration." The new features are made possible by the latest generation of Adobe Intelligent Cloud technology, including the Adobe Sensei AI and Cloud AI platforms, the Solid Angle middleware, and next-generation Content-Aware Fill, which leverages the GPU to deliver 3D-enabled content-aware editing of photos and videos. The new Web-based features of Photoshop give users full editing and robust collaboration capabilities without the need to download and install Photoshop.
