What's New In?

What is it? 4Easysoft Free PDF to GIF Converter is an easy-to-use tool that allows users to convert their PDF documents into high-quality animated GIF files. This tool allows you to retain the look of a page and its content as if it was drawn from scratch. You can use the program as a standalone app or integrate it with other applications. What does it offer? The basic conversion function of 4Easysoft Free PDF to GIF Converter provides you with a choice of only two output types: static and animated. For each of them, you can decide on the resolution (1-4: 256-1024), output directory (folder), frames per second and width. You can also set the background color, transparency, border and text color for each page. You can also easily modify the appearance of each image by applying a set of filters. Thanks to its advanced features and the intuitive interface, this tool can become a real workhorse. It is the perfect program to use if you want to convert PDF files to animated GIF files, without spending time searching for the perfect software and learning all its peculiarities. Key features: * Convert PDF to GIF files * Convert multiple PDF files into one animated GIF file * Manage both static and animated GIF files * Convert images with embedded or linked fonts * Filter image graphics * Export images to PNG, JPG, BMP and GIF formats * Adjust output resolution * Encrypt files with a password * Set output path, file name, file format, resolution and color palette * Upload converted files to FTP server * Set the number of frames per second * Retain the background color, transparency, border and text color * Enable watermark * Enable alpha channel * Enable original background color * Enable background transparency * Enable background color * Enable border color * Enable border transparency * Enable text color * Enable border transparency * Enable text transparency * Set image position on screen * Set image height and width * Set output quality * Set output directory * Convert to static GIF * Convert to animated GIF What is new in this release? What's new in this version: You can now convert PDF files with embedded or linked fonts You can now filter images with watermarks What is new in version 4.4.5: New: added ability to convert PDF files with embedded or linked fonts Fix: an error when processing document with large number of pages Fix: when converting animated GIF file, the file was overwritten Fix: a problem with "convert to static" when processing multipage documents Fix: a problem when converting documents with "convert to static" when the conversion path was already set Fix: a problem with "convert to static" when there was no appropriate font on the computer Fix: a problem with the rendering of large
