You can develop directly in PyQt. There are many tutorials that you can find at Qt site. BONUS: If you are using Linux you can add a custom icon with png here: Qt -> Tools -> Options -> Qt Assistant -> QML -> Icon Theme Qt -> Tools -> Options -> Qt Assistant -> Deployment here you can build for Windows, Linux and Mac. There is a list of tutorials here. There is another good tutorial here Written by Rastafoo69, Aug 14, 2011 Advertisements: After watching the Oracle video, there are two things I can think of immediately, neither of which are presented by the website. First, is the fact that he presented no evidence to back up his claims and relied heavily on statements from other white male authors to justify his need to take a woman's place. His claim that there are "no women security experts" sounds like a bold claim considering there are thousands of female security professionals. You could also look at the Wikipedia site where they have a little blurb about the author and his background. He seems to have a lot of experience in networking. In fact he has some credentials in management and IT security. I am sure he did a great job, he did what he thought would be best to help gain him some more Twitter followers, but I don't understand the shock. Second, I found it interesting that the "spirit of the law" was applied to him. He quoted a law to support his argument that he is allowed to rape her. The other strange thing is that he makes this claim on his personal website, which I highly doubt is an actual church. He is obviously a member of a church, but why is he claiming that "Christianity" is the one being opposed? Christianity is not about
