PC's are incredibly powerful computers, but not all of us have the cash to go out and buy a new one every 3 years. Not only that, but there are things like Apple Daily, which are often taking money off the value of a computer. However, I have also found that upgrading my laptop has been the best investment of my time. I've found that upgrading to a 13 inch laptop or larger will always allow me to run Photoshop, Illustrator, and Lightroom at day time and be able to use it to teach at night, or when I'm traveling. When I am buying an upgrade, there are two biggest things that I look for when considering whether the new computer will be going to be worth the money. e3d0a04c9c
