Marking up photos with text is a nice touch, but it could use a bit more work improving the placement of the banners. Some of them in my test images didn't allow for large banners on top of them, so that banner was missing. I like how it reads, but it will be nice to have larger and more distinct banner marks. And, as previously said, the setting isn't perfect. There's no official place to inspect the new banner positions. Also, ads don't display on all photos. Some ads simply disappear. Maybe in a future version? Adobe Photoshop is a great product with a clean interface and doesn't try to compete in features. Shuffling the rest of the pack below the 24 megabit download rate is tough, but not really a deal-breaker. I wish there was some way to increase the output size when cropping or resizing by up to a full size promotion, but switching to the new file format doesn't work with the native shortcuts that have been in place for ages. This is a little disconcerting because Photoshop masters already have long experience dealing with the large file sizes. Adobe Photoshop Lightroom 6 is a very pleasant release. I love the user interface and the blending of powerful features and intuitive simplicity. That said, I don't like the high price tag. I do, however, like the idea of a subscription model - as if I'm willing to pay for Lightroom when lots of tutorials and tutorials and tutorials are free on YouTube. Mark Touchstone's (who's excellent BeyondPSD website and YouTube channel are both worth looking at) must be a technologist with some passion, because I really can't imagine the development of this new feature having been a simple or easy task.
