Dreamweaver is a web designer's best friend. Adobe Photoshop is a graphics editor that is used by all web designers. Both Dreamweaver and Photoshop include many of the same features. Both have the ability to create web pages, but Photoshop is more powerful than Dreamweaver. To save time and money, it's best to use Photoshop when designing your website. But there is one thing that sets Photoshop apart from Dreamweaver and that is the price. While Dreamweaver is free, Photoshop is not. But you can still find a free version of Photoshop if you're willing to use the older version.

In my opinion, these features should be part of the print workflow and not hidden behind a few but very important buttons. I believe that Lightroom 4.1 lacks the necessary control over the print process and users would benefit from more flexibility. Especially since Adobe was once the flagship of quality and simplicity and is supposed to know how to make a perfect print workflow with its own software, it seems like a strange failure of imagination not to provide more control over print quality. I wouldn't even mind a way to specify image resolution when printing. After all, we as photographers are often more clever than we admit to ourselves. Lightroom should let us do it. There's also a very important minor issue with the latest update that I have noticed. I noticed that some of my older graphics designs, with the correct resolution of 60 dpi, were whited out when Adobe added itself to the top of the Graphics Design panel. It simply popped out beside the locked grid from the previous design and made that design unusable. Not the end of the world, but still annoying. I am sure that this is a fixable problem, one that can be addressed with a developer's attention. So, it's not that big a deal, but it's no fun either. Adobe has already implemented some buttons to hide the design button on top of the panel. Why couldn't they do that here too? Are minor issues like this why we pay them the big bucks? One last time, I'd love to hear your thoughts, so don't feel shy to drop them below.
